ABOUT ME

I am Madhavan Swami, a recent graduate from Dr. D. Y. Patil Institute of Technology, Pune, with a Bachelor's degree in Automation And Robotics Engineering. My journey in the world of technology began early, fuelled by a keen interest in computers, software, and games. I started with mini projects and games using block codes, which provided me with a foundational understanding of programming workflows and computer operations. This early curiosity led me to begin coding in Python in 2018.

I have a passion for building things from scratch and learning from the process. I am growth-oriented and continuously seek new opportunities that will help me expand my skills and knowledge. I am particularly fascinated by revolutionary technologies and am always eager to explore and understand their potential applications.

Currently, I am seeking a full-time position as a Flutter Developer. I am excited about the opportunity to contribute to innovative projects and work with cutting-edge technologies. My expertise in Flutter, combined with my backend development skills in Node.js as well as other skills, positions me well to develop robust, scalable, and user-friendly applications. I am enthusiastic about joining a dynamic team where I can apply my skills and grow as a professional.

Backend Soultions

Lead Developer

EOSTRE BIOSCIENCE PRIVATE LIMITED July,2023 - December,2023
